

RHINO

AppSumo submission packet

Copy, codes setup, and upload-ready media

Offer: 1 AppSumo code · \$5 one time · Unlimited Apple silicon Macs · Lifetime product updates

Prepared for the AppSumo partner editor

August 12, 2026 | rhinovoice.app

Submitter quick start

Everything needed for the listing is in this packet and the adjacent assets folder.

- Open Rhino's draft listing in the AppSumo partner editor
- Paste each labelled field from this packet into the matching editor field
- Choose Codes, set 1 code to \$5, and set the maximum code count to 1
- Upload the company icon, hero image, and four screenshots from the assets folder
- Save the draft and resolve any editor validation warnings
- Preview the listing, verify the code-redemption flow, then submit for review

Publishing gate: The code-redemption system is still being built. Do not publish the deal until a real AppSumo test code redeems end to end and unlocks Rhino correctly.

Manual items

- Company website is auto-filled by AppSumo
- Trust signals require real verification URLs and may be left blank if unavailable
- LinkedIn founder URL is optional and intentionally omitted
- Integrations should be left blank because Rhino works systemwide and has no direct integrations

Files to send with this document

- assets/03-dictionary.jpg
- assets/04-history.jpg

Basic information

Paste each value into the identically named AppSumo editor field.

Product name

Rhino

Category

Productivity *Choose the closest available option from AppSumo's searchable list*

Tagline

Private voice-to-text dictation for Mac

Secondary tagline

Talk naturally and type anywhere

Unique selling proposition

Unlike cloud dictation tools, Rhino transcribes and cleans up speech on your Mac, so your audio and words stay private while polished text appears in any app.

TL;DR

- Hold Fn, speak, and insert polished text into any Mac app
- Keep audio, transcripts, history, and AI cleanup on your Mac

Alternative to

Wispr Flow, Typeless, MacWhisper *Select only values AppSumo offers in its searchable list*

Integrations

Leave blank *Rhino works systemwide and has no direct integrations*

Best for

Entrepreneurs, freelancers, content creators *Select the closest available buyer types*

Limits checked: Product name 5/75 · Tagline 39/100 · Secondary tagline 32/140 · USP 158/255 · TL;DR bullets 57/128 and 60/128

Highlighted feature 1

Paste this title and its bullets into one feature story, then pair the indicated screenshot.

Section header

Dictate anywhere without sending your voice anywhere

Title

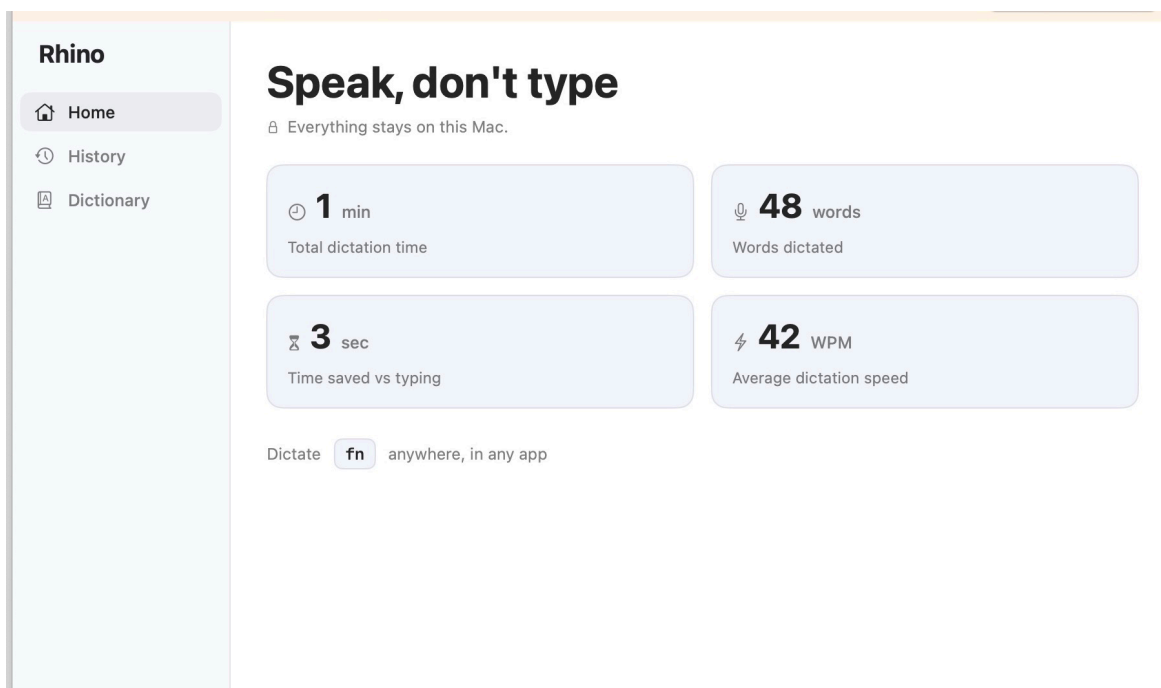

Turn speech into text in any Mac app

Bullets

- **Hold Fn and talk** while Rhino records from your active microphone
- **Release the key** to insert the transcript wherever your cursor is
- **Double-press the shortcut** to dictate hands-free, then press again to stop

Screenshot to pair

Rhino Home dashboard with local dictation stats

Upload file: assets/01-home.jpg | Alt text: Rhino Home dashboard

Highlighted feature 2

Paste this title and its bullets into one feature story, then pair the indicated screenshot.

Title

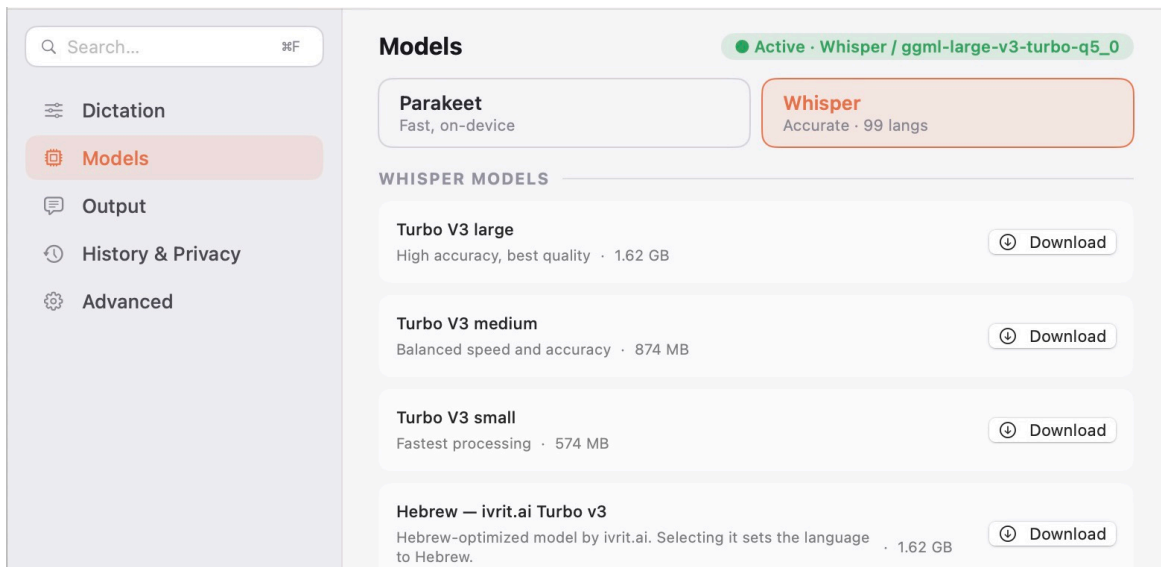

Keep every dictation private

Bullets

- **Transcribe on-device** with Whisper or Parakeet speech models
- **Clean up locally** with optional embedded AI for punctuation and casing
- **Work offline** after your chosen models have been downloaded
- **Skip accounts and telemetry** because dictation does not depend on cloud services

Screenshot to pair

On-device Whisper and Parakeet model settings

Upload file: assets/02-models.jpg | Alt text: On-device model settings

Highlighted feature 3

Paste this title and its bullets into one feature story, then pair the indicated screenshot.

Title

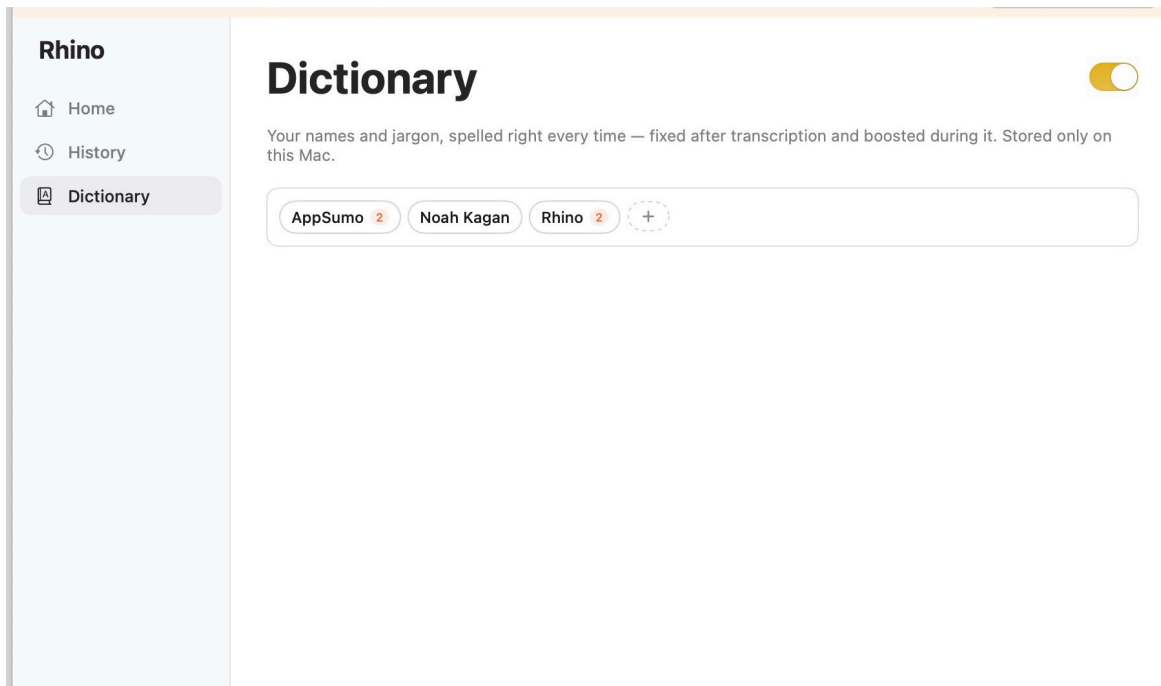

Make Rhino understand how you write

Bullets

- **Teach Rhino your vocabulary** with custom replacements for names and jargon
- **Search local history** to find previous dictations stored on your Mac
- **Track words and time saved** from the Home screen
- **Turn off history** whenever you do not want transcripts stored

Screenshot to pair

Personal dictionary with sample names and brand terms

Upload file: assets/03-dictionary.jpg | Alt text: Personal dictionary rules

Highlighted feature 4

Paste this title and its bullets into one feature story, then pair the indicated screenshot.

Title

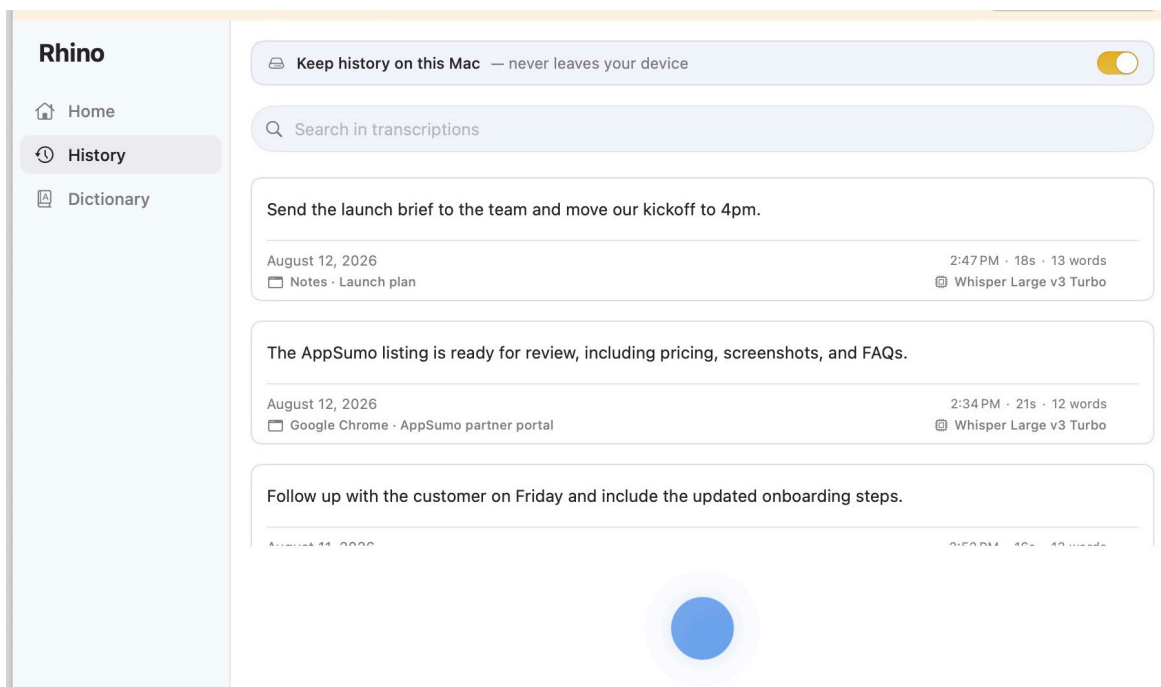

Reuse every recording

Bullets

- **Rerun saved recordings** with a different local speech model
- **Transcribe audio files** by dropping them into Rhino or using the command line
- **Review past dictations** without sending recordings to a remote server

Screenshot to pair

Local searchable dictation history with model details

Upload file: assets/04-history.jpg | Alt text: Local history and stats

Pricing

Use AppSumo's Codes pricing model. Do not select Licensing.

Pricing model

Codes

1 code

\$5

Maximum code count

1 Do not enable stacking because the base code already includes unlimited Mac installations

Feature matrix

Feature	1 code
Mac installations	Unlimited
Dictation usage	Unlimited
Lifetime product updates	Included
On-device transcription	Whisper and Parakeet
Optional local AI cleanup	Included
Custom dictionary	Included
Local history and stats	Included
Audio-file transcription	Included

Redemption method: AppSumo codes. The redemption system is being built and must pass an end-to-end test before publication.

Product story

Paste the narrative as three separate paragraphs.

Headline

Why I built Rhino

Founder narrative

I founded AppSumo, so I have spent years trying software that promises to save people time. I kept coming back to the same problem with dictation tools: many send sensitive conversations to the cloud or add more complexity than I want from a Mac app. I wanted to speak naturally and have clean text appear wherever I was working, without wondering who else could access my words.

I built Rhino as privacy-first dictation software for entrepreneurs, freelancers, creators, and anyone who thinks faster than they type. Speech recognition, optional AI cleanup, history, and personal dictionary data stay on the Mac. After the models are downloaded, Rhino can turn speech into text even when Wi-Fi is off.

I am keeping Rhino small and focused. My goal is to keep improving transcription quality and speed while protecting the local-first promise: talk, get useful text, and keep your voice on your own computer.

Name	Noah Kagan
Role	Founder
Founded	2026
Headquarters	Austin, TX
Team size	Solo
Stage	Indie
Funding	Bootstrapped

FAQ

Create eight question-and-answer pairs. Keep each answer under two sentences.

Q1. Is this lifetime access?

Yes. One code includes lifetime access to Rhino and future product updates.

Q2. How do I redeem my AppSumo code, and how many Macs can I use?

Follow the redemption instructions included with your AppSumo purchase. One code gives you access on unlimited Apple silicon Macs.

Q3. Does my voice or transcript leave my Mac?

No. Audio, transcripts, history, and optional AI cleanup stay on your Mac; Rhino only connects for signed update checks and model downloads you start.

Q4. Can Rhino work without an internet connection?

Yes. After you download your chosen speech model and optional cleanup model, dictation works offline.

Q5. What are the system requirements?

Rhino requires an Apple silicon Mac running macOS 14 or later. Intel Macs are not currently supported.

Q6. Which apps does Rhino work with?

Rhino inserts text into the Mac app where your cursor is active. It needs Microphone and Accessibility permissions, and modifier-only shortcuts such as Fn also require Input Monitoring.

Q7. Can I control or delete my dictation history?

Yes. History stays on your Mac, and you can turn it off, delete individual recordings, clear everything, or set retention limits.

Q8. What support and refund coverage do I get?

Email noah@appsumo.com for support. AppSumo purchases are covered by AppSumo's 60-day money-back guarantee.

Media upload guide

All upload files are in the assets folder beside this document.

Slot	File	Alt text
Company icon	company-icon-512.png	Rhino app icon
Hero	hero-1920x1080.jpg	Rhino Home dashboard
Screenshot 1	01-home.jpg	Rhino Home dashboard
Screenshot 2	02-models.jpg	On-device model settings
Screenshot 3	03-dictionary.jpg	Personal dictionary rules
Screenshot 4	04-history.jpg	Local history and stats

Hero image

1920 × 1080 JPG, under 5 MB

Media checked: Icon is 512 × 512 · Hero is 1920 × 1080 · Four screenshots use current Rhino v0.1.3 UI and synthetic demo data

Final preflight

Complete this checklist immediately before submitting the listing for AppSumo review.

- Product name, taglines, USP, and exactly two TL;DR bullets are present
- Four feature stories are paired to screenshots in the stated order
- Pricing model says Codes, not Licensing
- One code costs \$5 and maximum code count is 1
- Unlimited Apple silicon Mac usage and lifetime updates are explicit
- Founder facts read Solo, Indie, Bootstrapped, Austin, TX, and 2026
- All eight FAQ pairs are entered
- Website and any real trust-signal URLs are correct
- A real AppSumo test code redeems successfully
- Preview contains no validation errors, accidental monthly pricing, or unsupported claims

Ready to submit: Once the redemption test passes and the preview matches this packet, submit the draft for AppSumo review.
